

**Agreement for Using the
HUG-VIS Dataset
for a Non-Commercial Academic Research Project**

between
Guangdong Laboratory of Artificial Intelligence and Digital Economy (SZ)
GML-MMGroup
and

Name¹

Official E-mail²

Institution

Position / Title

Upon approval, the Applicant will receive personal access credentials to the HUG-VIS audiovisual recordings, text, metadata, annotations, alpha mattes, and related files (collectively, the “Dataset”). The Dataset is provided solely for non-commercial academic research and scholarly publication. Any work using the Dataset must cite:

```
@article{ma2026hugvis,  
  title={HUG-VIS: A Multimodal Benchmark for Human-centered Understanding and Generation in Visual Intelligence},  
  author={Ma, Fei and Cheng, Zebang and Li, Minghui and Xu, Hongbo and Tan, Yuyong and Shao, Yihua and Wang, Hanling  
and Liu, Zhou and Gao, Yuqing and Wang, Dong and Ma, Long and Cui, Laizhong and Sebe, Nicu and Tian, Qi},

  url={https://arxiv.org/abs/2608.26517}  
}
```

1. Academic use only. The Dataset and any models or materials derived from it may be used only for scientific, educational, and non-commercial academic purposes. Commercial use is prohibited, including product or service development, commercial testing or benchmarking, advertising, paid services, resale or licensing, and commercial model training or deployment.

2. No redistribution. The Applicant must not sell, transfer, sublicense, publish, upload, or otherwise provide the Dataset, access credentials, annotations, or restricted derivatives to any third party. Members of the Applicant’s research group may access the Dataset only under the Applicant’s direct supervision and these same terms; the Applicant remains responsible for their compliance.

3. No alteration or republication. The original video and audio content must not be edited, manipulated, composited, dubbed, replaced, or republished as modified source data. Technical processing necessary for research—such as decoding, resizing, frame sampling, normalization, augmentation, or feature extraction—is allowed only within the approved research environment. Processed copies and newly created annotations remain restricted and may not be distributed as official HUG-VIS data without prior written permission.

4. Privacy and responsible use. The Applicant must not identify, re-identify, contact, track, impersonate, or harm any recorded person, or use the Dataset for surveillance, deceptive deepfakes, defamation, discrimination, sexual content, or unlawful purposes. Raw or identifiable samples, screenshots, audio clips, or outputs reproducing a participant’s recognizable face or voice may not be publicly released without prior written permission from the Data Provider.

5. Security, deletion, and termination. The Dataset must be stored securely and accessed only by permitted research-group members. Any loss, leak, or unauthorized access must be reported promptly to the Data Provider. All copies must be deleted when the research ends, access is withdrawn, or deletion is requested. All rights remain with the Data Provider and/or applicable rights holders. The Dataset is provided “as is”; to the extent permitted by law, the Data Provider disclaims warranties and liability. Access may be suspended or terminated for any breach.

Please send this signed form from the official institutional e-mail address stated above. Personal e-mail submissions will not be accepted.

I have read and understood this Agreement and agree to comply with it.

Date

Signature

¹ The responsible signatory must be a faculty member, researcher, or research staff member employed by a university or public/non-profit research institution. Students may not sign as the responsible Applicant.

² The e-mail address must be an official institutional address. It will be used to verify the application and send the data-access information.
